ESSOFLX 250™ VIRGIN OIL LOW COST ALTERNATIVE TO PAVING

Acknowledged as the best product on the market for dust suppression and stabilization, Essoflex 250™ Virgin Oil is designed to coat and bind aggregate matter in place to eliminate dust and stabilize road surfaces. It is also an effective low cost surface treatment and should be strongly considered as an alternative to costly paving.

BENEFITS OF SURFACE TREATING WITH ESSOFLEX 250™ VIRGIN OIL

- 1. Hard, weather sealed, smooth riding surface free of hazardous dust. A higher level of service than gravel.*
- 2. Provides a surface that can if necessary be reworked and shaped using existing equipment and materials, i.e. a grader.*
- 3. Eliminates the need for patching or spray patching equipment and materials.*
- 4. Low annual average costs due to minimal gravel replacement costs, minimal grading expenses (once or twice a year) and reduced washout repair costs.*
- 5. Public approval – Up to 5 times cheaper than tar & chip.*

Essoflex 250™ is a premium Road Enhancement Product. As a dust suppressant, it is designed to coat and bind aggregate matter in place to eliminate dust and stabilize the road surface. As a surface treatment, it is designed to give you the stability of pavement, with the maintenance level of a gravel road at a fraction of the cost.

BENEFITS OF USING ESSOFLEX 250™

- ▶ *Remains effective under the driest of conditions*
- ▶ *Extremely effective on sandy road bases and heavy traffic roadways*
- ▶ *Single applications last all season*
- ▶ *Minimal continued maintenance on the treated road*

If you have roads with extremely challenging dust issues, on which everything else you have tried has failed and paving looks like your only option, then Da-Lee's Virgin Oil is the answer. Annual application of Essoflex 250™ virgin oil essentially gives you a road that acts like pavement that you can maintain like gravel. This is a much more cost effective solution for your municipality.

Essoflex 250™ - a low cost alternative to paving roadways within your municipality.

Low Cost – Highly Effective
